

Summary

Experienced Frontend Developer with 4 years of expertise in HTML, CSS, JavaScript, and ReactJS. Skilled in creating scalable and user-friendly web applications, adept at collaborating in cross-functional teams, and mentoring software engineers for efficient project delivery. Passionate about staying current with industry best practices.

Skills

HTML5 | CSS3 | Tailwind CSS | JavaScript | TypeScript | React.js | Next.js | Redux | MongoDB | Docker | Git |

Work Experience

EY | Senior Consultant

Dec'23- Present

- Spearheaded the development of **Banking Domain** web applications using **React.js** and **Redux**, ensuring efficient state management.
- Collaborated closely with stakeholders to understand project requirements, contributing to successful project delivery.
- Implemented **responsive design** principles, enhancing the user experience on various devices and screen sizes.
- Conducted regular **code reviews** to maintain high code quality and identify opportunities for improvement.
- Actively participated in client meetings, presenting **technical solutions**, and addressing client concerns effectively.

Here Technologies | Software Engineer II

Feb'23- Dec'23

- Developed and Enhanced **map-based** web applications using **React.js** and **Redux**, resulting in a **40%** increase in customer engagement through **UI** redesigns.
- Conducted comprehensive end-to-end **testing**, identifying and resolving bugs to ensure a seamless user experience.
- Actively participated in **Agile** development processes, providing valuable input and adapting to a fast-paced environment.
- Collaborated with **UX/UI designers** to implement visually appealing and intuitive interfaces.
- Introduced performance **optimization** techniques, reducing page load times by **20%** and enhancing overall application **responsiveness**.

Larsen Toubro Infotech | Senior Software Engineer

Oct'19- Jan'23

- Architected front-end functionality for **e-commerce** sites, integrating dynamic payment gateways and boosting checkout conversion rates by **25%**.
- Implemented **TypeScript** for type checking, contributing to more robust and maintainable code.
- Developed **reusable components** and libraries, streamlining the frontend development process.
- Improved the performance and load times of web applications through **optimization** techniques.
- Collaborated with **cross-functional** teams, including backend developers and QA engineers, to ensure seamless integration of frontend and backend components.

Education

Shri Narsee Monjee college, University of Mumbai, India

2016 - 2019

- Bachelor of Science (B.SC.) in Information Technology | CGPA: **7.5**

Threads-clone

[Github](#) | [Live Demo](#)

Threads Clone is a project that replicates core features of the communication app 'Threads,' focusing on private and close circle communication.

- Developed a responsive and user-friendly interface using **React** and **Next.js** for optimal performance.
- Utilized **TypeScript** and **Tailwind CSS** for maintainable code and polished, consistent styling.
- Integrated **Redux** for efficient state management and **MongoDB** for seamless communication.
